*Class XII, Secured an aggregate of - 70%*                                                        *Ludhiana, India*

**Rajeev Gandhi Computer Saksharta Mission**                                                        **Feb 2017**
*Diploma in Office Automation and Publishing, Secured an aggregate of - 79%*                        *Ludhiana, India*

## SKILLS

**Languages:** Java, C Sharp, JavaScript
**Databases:** Mongodb, SQL, firebase
**Technologies/Frameworks:** ReactJs, Azure , GitHub, ASP.Net , GSAP

## Work Experience

**Cognizant (Programmer Analyst Trainee)**                                                        **Dec 2023 – Present**
**Skills:** Agile, SDLC, SQL, C sharp, Github, ASP.Net                                                *Pune,India*

**Frontend Developer at Rocky Mountain Technologies**                                            **July 2023 – Dec 2023**
* Spearheaded the development of user-friendly and visually appealing web applications.            *Ludhiana,India*
* Actively contributing to the timely delivery of sprint goals and ensuring alignment with overall project timelines.

## PROJECTS

**Flight Ticket Booking** | .net, C sharp , MVC                                                        **April 2024**
* developed a robust flight ticket booking system utilizing the .NET framework and MVC methodology, ensuring a scalable and maintainable architecture. The frontend was crafted with HTML, CSS, and Bootstrap to provide a responsive and user-friendly interface. This integration allows for seamless interaction and efficient booking processes for users.

**Gym Management** | React, Node JS ,Material UI, Firebase                                            **March 2023**
· Developed a Gym Management System using React, Node Js, Material UI, and Firebase. Implemented user authentication, real-time database updates, and responsive design, enhancing user experience and operational efficiency. Integrated payment processing and scheduling features to streamline gym operations.

**Portfolio Website** | React, Node JS , MongoDB                                                        **Jan 2023**
· Developed a personal portfolio web application using React for the frontend, Node.js for the backend, and MongoDB for the database. The project showcases my skills, experience, and projects, featuring responsive design, dynamic content, and an intuitive user interface.

## Certifications & Achievements

* Full Stack Development : Ansh Infotech
* Web with Java : Auribises pvt. ltd
* Winner of Hackathon 1.1, Team -TECH GEEKERS | Competing 20+ teams
